

1. Executive Summary

TITLE:

Portfolio Risk Distribution Overview

WHAT I DID

Analyzed the distribution of vendors across different risk levels to understand overall portfolio exposure. Calculated the count and percentage of vendors in each risk tier (Critical, High, Medium, Low) across the full 1,000 vendor portfolio to provide an executive level view of overall risk exposure.

```
1  -- 1. EXECUTIVE SUMMARY (High-Level Profile)
2  -- Summary of total vendors, average risk scores, and overall status.
3  • SELECT
4      Overall_risk_complaine AS Risk_Level,
5      COUNT(*) AS Vendor_Count,
6      ROUND((COUNT(*) / (SELECT COUNT(*) FROM vendor_audit)) * 100, 2) AS Percentage_of_Portfolio
7  FROM vendor_audit
8  GROUP BY Overall_risk_complaine
9  ORDER BY Field(Overall_risk_complaine, 'High', 'Medium', 'Low');
10
11
```

Result Grid

Filter Rows:

Export:

Wrap Cell Content:

	Risk_Level	Vendor_Count	Percentage_of_Portfolio
▶	Critical	260	26.00
	High	221	22.10
	Medium	257	25.70
	Low	262	26.20

INSIGHT

This provides a high-level view of vendor risk distribution, helping stakeholders understand how risk is spread across the entire vendor portfolio. With 48.1% of vendors in the High or Critical tiers, this portfolio would trigger an immediate risk reduction program at any regulated fintech. PCI-DSS requires that Critical vendors in the cardholder data environment (CDE) are reviewed without delay representing a mandatory compliance obligation, not just a best practice.

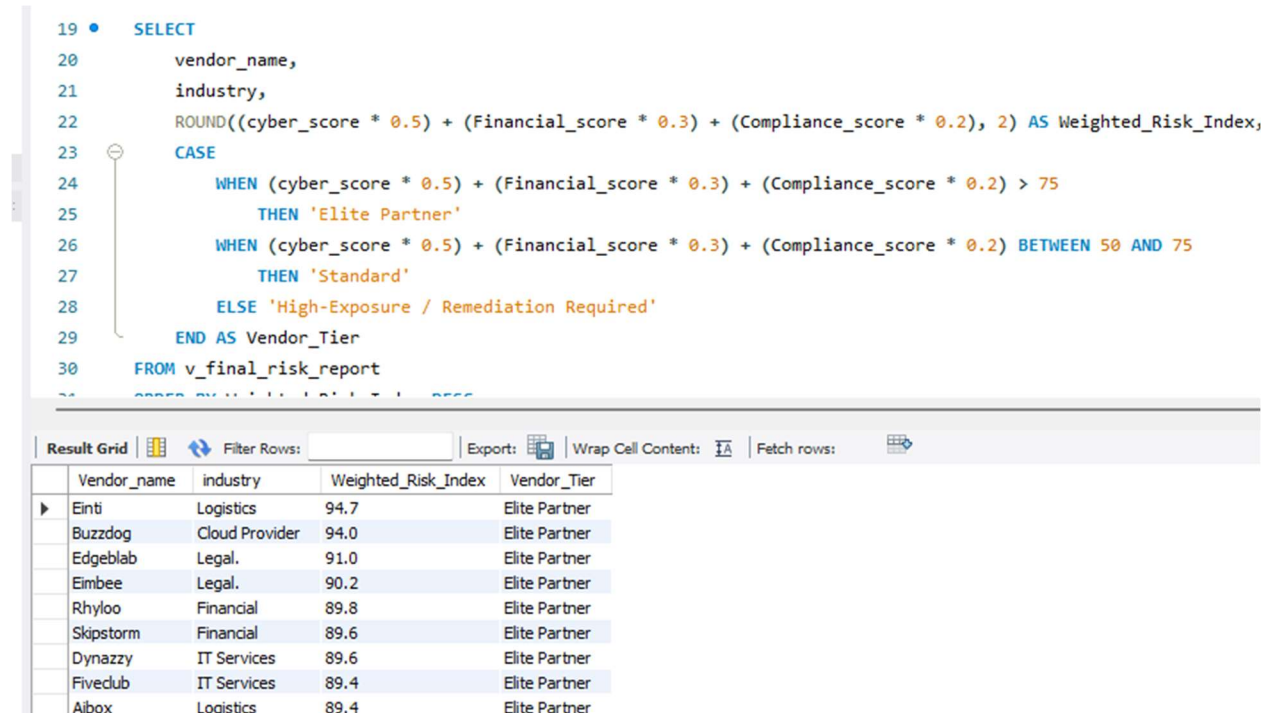

2. Weighted Risk Scoring

TITLE:

Weighted Vendor Risk Scoring Model

WHAT I DID

Calculated a weighted risk index using cyber (50%), financial (30%), and compliance (20%) scores to rank vendor risk exposure.

```
19 • SELECT
20     vendor_name,
21     industry,
22     ROUND((cyber_score * 0.5) + (Financial_score * 0.3) + (Compliance_score * 0.2), 2) AS Weighted_Risk_Index,
23     CASE
24         WHEN (cyber_score * 0.5) + (Financial_score * 0.3) + (Compliance_score * 0.2) > 75
25             THEN 'Elite Partner'
26         WHEN (cyber_score * 0.5) + (Financial_score * 0.3) + (Compliance_score * 0.2) BETWEEN 50 AND 75
27             THEN 'Standard'
28         ELSE 'High-Exposure / Remediation Required'
29     END AS Vendor_Tier
30 FROM v_final_risk_report
```

Vendor_name	industry	Weighted_Risk_Index	Vendor_Tier
Einti	Logistics	94.7	Elite Partner
Buzzdog	Cloud Provider	94.0	Elite Partner
Edgeblab	Legal.	91.0	Elite Partner
Eimbee	Legal.	90.2	Elite Partner
Rhyloo	Financial	89.8	Elite Partner
Skipstorm	Financial	89.6	Elite Partner
Dynazzy	IT Services	89.6	Elite Partner
Fivedub	IT Services	89.4	Elite Partner
Aibox	Logistics	89.4	Elite Partner

INSIGHT

This query calculates a composite Weighted Risk Index for each vendor using the formula: Cyber (50%) + Financial (30%) + Compliance (20%). Despite all five categories averaging below 60 on cybersecurity at the category level, individual vendors can still score highly when their financial and compliance scores are strong. The top results show vendors like Einti (Logistics, 94.7), Buzzdog (Cloud Provider, 94.0), and Edgeblab (Legal, 91.0) classified as Elite Partners.

3. Industry Criticality Analysis

TITLE:

Industry Level Risk Assessment

WHAT I DID

Analyzed average risk scores across industries to determine which sectors pose the highest risk exposure.

```
37 • SELECT
38     v.Category,
39     COUNT(v.vendor_id) AS Total_Vendors,
40     AVG(a.cyber_score) AS Avg_Cyber_Score,
41     AVG(a.Financial_score) AS Avg_Financial_Score,
42     CASE
43         WHEN AVG(a.cyber_score) < 60 THEN 'IMMEDIATE ATTENTION'
44         WHEN AVG(a.cyber_score) BETWEEN 60 AND 75 THEN 'MONITOR'
45         ELSE 'STABLE'
46     END AS Strategic_Priority
47 FROM tprm_vendors v
48 JOIN vendor_audit a ON v.vendor_id = a.vendor_id
49 GROUP BY v.Category
50 ORDER BY Avg_Cyber_Score ASC;
51
```

Category	Total_Vendors	Avg_Cyber_Score	Avg_Financial_Score	Strategic_Priority
Logistics	190	49.4737	51.6000	IMMEDIATE ATTENTION
Legal.	186	50.4677	51.7419	IMMEDIATE ATTENTION
Cloud Provider	215	50.7070	48.8233	IMMEDIATE ATTENTION
IT Services	204	51.8775	52.0980	IMMEDIATE ATTENTION
Financial	206	51.8883	53.9466	IMMEDIATE ATTENTION

INSIGHT

This query groups vendors by category and calculates the average cybersecurity and financial scores for each. The result revealed that all five vendor categories Logistics (49.47), Legal (50.47), Cloud Provider (50.71), IT Services (51.88), and Financial (51.88) scored below 60, triggering an IMMEDIATE ATTENTION flag

across the entire portfolio. This is a critical finding that shows no vendor category is operating at an acceptable cybersecurity standard, meaning the organization has broad and systemic exposure rather than isolated pockets of risk.

4. Red Flag Report

TITLE:

High-Risk Vendor Identification (Red Flag Report)

WHAT I DID

Identified vendors in critical categories with low cyber scores (< 50) and high risk classification

```
59  -- THE "RED FLAG" REPORT (Risk Concentration)
60  -- Vendors that could cause a bankruptcy or a data breach tomorrow.
61  •  SELECT
62      v.vendor_name,
63      v.category,
64      a.cyber_score,
65      a.Compliance_score,
66      a.Overall_risk_complaine
67  FROM tprm_vendors v
68  JOIN vendor_audit a ON v.vendor_id = a.vendor_id
69  WHERE v.category = 'Critical'
70      AND (a.cyber_score < 50 OR a.Overall_risk_complaine = 'High')
71  ORDER BY a.cyber_score ASC;
72
```

Result Grid		 Filter Rows:	Export: 	Wrap Cell Content: 
vendor_name	category	cyber_score	Compliance_score	Overall_risk_complaine

INSIGHT

These vendors represent immediate operational and security threats and should be prioritized for remediation or contract review, fortunately there is zero threat

5. Remediation Tracker

TITLE

Vendor Remediation Action Plan

WHAT I DID

Generated actionable remediation steps based on vendor risk scores to guide corrective actions.

99 • SELECT

100 v.vendor_name,

101 a.Overall_risk_compliance,

102 'Urgent' AS Action_Priority,

103 CASE

104 WHEN a.cyber_score < 40 THEN 'Initiate Technical Security Audit'

105 WHEN a.Financial_score < 40 THEN 'Request 3-Year Audited Financials'

106 ELSE 'Quarterly Performance Review'

107 END AS Recommended_Next_Steps

108 FROM tprm_vendors v

109 JOIN vendor_audit a ON v.vendor_id = a.vendor_id

110 WHERE a.Overall_risk_compliance = 'High';

111

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

	vendor_name	Overall_risk_compliance	Action_Priority	Recommended_Next_Steps
▶	Brainsphere	High	Urgent	Quarterly Performance Review
	Zazio	High	Urgent	Initiate Technical Security Audit
	Innotype	High	Urgent	Initiate Technical Security Audit
	Ooba	High	Urgent	Quarterly Performance Review
	Skippad	High	Urgent	Initiate Technical Security Audit
	Quimba	High	Urgent	Quarterly Performance Review
	Layo	High	Urgent	Quarterly Performance Review
	Twimm	High	Urgent	Quarterly Performance Review
	Realblab	High	Urgent	Request 3-Year Audited Financials
	Blogtag	High	Urgent	Initiate Technical Security Audit
	Skyba	High	Urgent	Quarterly Performance Review
	Roexo	High	Urgent	Quarterly Performance Review
	Cogilith	High	Urgent	Quarterly Performance Review
	Feednation	High	Urgent	Initiate Technical Security Audit
	Vonniv	High	Urgent	Initiate Technical Security Audit

INSIGHT

This SQL query retrieves all vendors classified as having a HIGH overall risk compliance level and automatically marks their action priority as URGENT. It then uses a CASE statement to dynamically evaluate specific risk weaknesses, prioritizing cybersecurity vulnerability over financial instability.
