

STORED PROCEDURE: Automated Risk Reporting & Vendor Intelligence System

1. Industry Based Vendor Risk Assessment Report

TITLE

Industry Based Vendor Risk Assessment

WHAT I DID

Created a stored procedure to analyze vendor risk profiles within a selected industry, enabling dynamic filtering of risk exposure.

```
1  -- 1.INDUSTRY BASED VENDOR RISK ASSESSMENT REPORT
2  DELIMITER //
3
4  • CREATE PROCEDURE Get_Industry_Risk_Report(IN input_industry VARCHAR(100))
5  BEGIN
6      SELECT
7          v.Vendor_name,
8          v.Category,
9          a.cyber_score,
10         a.financial_score,
11         a.compliance_score,
12         CASE
13             WHEN a.cyber_score < 50 THEN 'URGENT: SECURITY REVIEW'
14             WHEN a.financial_score < 40 THEN 'CRITICAL: FINANCIAL DISTRESS'
15             ELSE 'MAINTAIN MONITORING'
16         END AS Consultant_Recommendation
17     FROM tprm_vendors v
18     JOIN vendor_audit a ON v.Vendor_id = a.vendor_id
19     -- This line is the secret sauce: it trims spaces and does a partial match
20     WHERE v.Category LIKE CONCAT('%', TRIM(input_industry), '%')
21     ORDER BY a.cyber_score ASC;
22 END //
23
24 DELIMITER ;
```

THE CALL

- `CALL Get_Industry_Risk_Report('IT Services');`

It Grid Filter Rows: Export: Wrap Cell Content: IA						
Vendor_name	Category	cyber_score	financial_score	compliance_score	Consultant_Recommendation	
Edgeblab	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT	
Brainverse	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT	
Brainsphere	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT	
Devpoint	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT	
Minyx	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT	
Quimba	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT	
Npath	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT	
Blogtag	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT	
Rebba	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT	

INSIGHT

The executed stored procedure reveals that all listed IT Services vendors currently have Pending cybersecurity, financial, and compliance scores. Because of these unverified metrics, the system has automatically flagged every vendor with a high-priority "ACTION REQUIRED: SCHEDULE AUDIT" recommendation.

Operating with Pending risk profiles violates fintech regulations like the CBN Cybersecurity Framework, NDPA, and PCI DSS, which mandate active third party oversight. Fintech cannot legally integrate or maintain active relationships with IT vendors whose operational integrity and data protection measures remain unvalidated.

2. Top Performing Vendors Procedure

TITLE

Identification of High Performing Vendors

WHAT I DID

Developed a reusable procedure to retrieve vendors that meet or exceed defined performance thresholds across all risk dimensions.

```
DELIMITER //
```

- ```
CREATE PROCEDURE Get_Top_Vendors(IN min_score INT)
BEGIN
 SELECT
 v.Vendor_name,
 v.Category,
 a.cyber_score,
 a.financial_score,
 a.compliance_score
 FROM tprm_vendors v
 JOIN vendor_audit a ON v.Vendor_id = a.vendor_id
 WHERE
 a.cyber_score >= min_score
 AND a.financial_score >= min_score
 AND a.compliance_score >= min_score
 ORDER BY a.cyber_score DESC, a.financial_score DESC;
END //
```

```
DELIMITER ;
```

**THE CALL:**

4 • **CALL** Get\_Top\_Vendors(80);

| Result Grid  |             |                |             |                    |                  |

|              | Cogilith    | IT Services    | 82          | 82                 | 83               |
|              | Dynava      | Legal.         | 80          | 90                 | 87               |

## INSIGHT

This stored procedure filters the vendor database to display only partners with risk and compliance scores of 80 or above. The output lists top-performing vendors across critical service categories, including Logistics, Cloud Providers, Legal, IT Services, and Financial services. Every vendor in this list successfully meets or exceeds the threshold across all three pillars: cyber, financial, and compliance scores. From a GRC perspective, these high-scoring entities represent low risk, compliant partners that are ideal candidates for safe, streamlined onboarding. Maintaining this verified database directly supports regulatory compliance with frameworks like the CBN and NDPA by demonstrating robust third-party due diligence.

## 3. Compliance Alert System

### TITLE

### Vendor Compliance Alert System

## WHAT I DID

Built an automated compliance monitoring procedure to classify vendors based on compliance score thresholds.

```
50 -- 3. VENDOR COMPLIANCE ALERT SYSTEM
51
52 DELIMITER //
53
54 • CREATE PROCEDURE Get_Compliance_Alerts()
55 BEGIN
56 SELECT
57 v.Vendor_name,
58 v.Category,
59 a.compliance_score,
60 CASE
61 WHEN a.compliance_score < 40 THEN 'CRITICAL NON-COMPLIANCE'
62 WHEN a.compliance_score BETWEEN 40 AND 60 THEN 'MODERATE RISK'
63 ELSE 'COMPLIANT'
64 END AS Compliance_Status
65 FROM tprm_vendors v
66 JOIN vendor_audit a ON v.Vendor_id = a.vendor_id
67 WHERE a.compliance_score < 60
68 ORDER BY a.compliance_score ASC;
69 END //
70
```

---

## THE CALL:

13

14 • **CALL** Get\_Compliance\_Alerts();

| Result Grid    Filter Rows: <input type="text"/>   Export:    Wrap Cell Content:  |                |                  |                         |  |

## INSIGHT

The stored procedure has flagged active third-party vendors with failing compliance scores of **39** and **40**. Operating with these non-compliant entities directly violates the **CBN's Risk-Based Cybersecurity Framework** and operational resilience directives. For IT and Cloud providers, these failing grades constitute a severe breach of data protection requirements under the **Nigeria Data Protection Act (NDPA)**. To avoid severe regulatory fines under **BOFIA 2020**, compliance teams must immediately trigger SLA audit rights to suspend or remediate these high-risk relationships.
