Stored Procedures: Automated Risk Reporting & Vendor Intelligence System

1. Industry Based Vendor Risk Assessment Report

TITLE

Industry Based Vendor Risk Assessment

WHAT I DID

Created a stored procedure to analyze vendor risk profiles within a selected industry, enabling dynamic filtering of risk exposure.

```
-- 1.INDUSTRY BASED VENDOR RISK ASSESSMENT REPORT
DELIMITER //

CREATE PROCEDURE Get_Industry_Risk_Report(IN input_industry VARCHAR(100))
BEGIN
    SELECT
        v.Vendor_name,
        v.Category,
        a.cyber_score,
        a.financial_score,
        a.compliance_score,
        CASE
            WHEN a.cyber_score < 50 THEN 'URGENT: SECURITY REVIEW'
            WHEN a.financial_score < 40 THEN 'CRITICAL: FINANCIAL DISTRESS'
            ELSE 'MAINTAIN MONITORING'
        END AS Consultant_Recommendation
    FROM tprm_vendors v
    JOIN vendor_audit a ON v.Vendor_id = a.vendor_id
    -- This line is the secret sauce: it trims spaces and does a partial match
    WHERE v.Category LIKE CONCAT('%', TRIM(input_industry), '%')
    ORDER BY a.cyber_score ASC;
END //

DELIMITER ;
```

THE CALL

Stored Procedures: Automated Risk Reporting & Vendor Intelligence System

```
CALL Get_Industry_Risk_Report('IT Services');
```

lt Grid | Filter Rows: | Export: | Wrap Cell Content:

Vendor_name	Category	cyber_score	financial_score	compliance_score	Consultant_Recommendation
Edgeblab	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT
Brainverse	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT
Brainsphere	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT
Devpoint	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT
Minyx	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT
Quimba	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT
Npath	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT
Blogtag	IT Services	Pending	Pending	Pending	ACTION REQUIRED: SCHEDULE AUDIT

INSIGHT

This procedure allows stakeholders to evaluate vendor risk within specific industries, supporting targeted risk mitigation strategies and compliance monitoring

2. Top Performing Vendors Procedure

TITLE

Identification of High Performing Vendors

WHAT I DID

Developed a reusable procedure to retrieve vendors that meet or exceed defined performance thresholds across all risk dimensions.

Stored Procedures: Automated Risk Reporting & Vendor Intelligence System

```
DELIMITER //

CREATE PROCEDURE Get_Top_Vendors(IN min_score INT)
BEGIN
    SELECT
        v.Vendor_name,
        v.Category,
        a.cyber_score,
        a.financial_score,
        a.compliance_score
    FROM tprm_vendors v
    JOIN vendor_audit a ON v.Vendor_id = a.vendor_id
    WHERE
        a.cyber_score >= min_score
        AND a.financial_score >= min_score
        AND a.compliance_score >= min_score
    ORDER BY a.cyber_score DESC, a.financial_score DESC;
END //

DELIMITER ;
```

THE CALL:

```
13 •  CALL Get_Top_Vendors(80);
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

Vendor_name	Category	cyber_score	financial_score	compliance_score
Mydo	Logistics	100	95	81
Mydo	Logistics	93	99	89
Mydo	Logistics	93	85	95
Muxo	IT Services	92	88	85
Mydo	Logistics	91	81	99
Mydo	Logistics	90	86	93
Mydo	Logistics	90	83	92
Mydo	Logistics	86	91	80
Mydo	Logistics	86	85	80

INSIGHT

Stored Procedures: Automated Risk Reporting & Vendor Intelligence System

This enables quick identification of strong performing vendors, supporting strategic partnership decisions and vendor optimization.

3. Compliance Alert System

TITLE

Vendor Compliance Alert System

WHAT I DID

Built an automated compliance monitoring procedure to classify vendors based on compliance score thresholds.

```sql
CREATE PROCEDURE Get_Compliance_Alerts()
BEGIN
    SELECT
        v.Vendor_name,
        v.Category,
        a.compliance_score,
        CASE
            WHEN a.compliance_score < 40 THEN 'CRITICAL NON-COMPLIANCE'
            WHEN a.compliance_score BETWEEN 40 AND 60 THEN 'MODERATE RISK'
            ELSE 'COMPLIANT'
        END AS Compliance_Status
    FROM tprm_vendors v
    JOIN vendor_audit a ON v.Vendor_id = a.vendor_id
    WHERE a.compliance_score < 60
    ORDER BY a.compliance_score ASC;
END //

DELIMITER ;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

Vendor_name	Category	compliance_score	Compliance_Status
Mydo	Logistics	1	CRITICAL NON-COMPLIANCE
Mydo	Logistics	1	CRITICAL NON-COMPLIANCE
Mydo	Logistics	1	CRITICAL NON-COMPLIANCE
Mydo	Logistics	1	CRITICAL NON-COMPLIANCE
Mydo	Logistics	1	CRITICAL NON-COMPLIANCE
Mydo	Logistics	1	CRITICAL NON-COMPLIANCE
Mydo	Logistics	2	CRITICAL NON-COMPLIANCE

INSIGHT

Stored Procedures: Automated Risk Reporting & Vendor Intelligence System

This system helps proactively identify non-compliant vendors, allowing early intervention before regulatory or operational risks escalate.
